Secondary Data Metadata Review

Source: This dataset is sourced from Kaggle, a well-known platform for datasets and data science competitions. dataset

Date collected: We are utilizing a dataset that includes flights departing from or arriving at several major airports: O'Hare International Airport (ORD) in Chicago, Los Angeles International Airport (LAX) in Los Angeles, John F. Kennedy International Airport (JFK) in New York City, McCarran International Airport (LAS) in Las Vegas, Logan International Airport (BOS) in Boston, and San Francisco International Airport (SFO) in San Francisco. The data spans a collection period from 26/6/2024, to 3/7/2024.

Collection Method: The dataset includes data about flight prices collected from airline websites and booking services. It likely involves scraping or aggregating prices over time to track fluctuations, but the exact method used for data collection isn't explicitly detailed in the dataset description.
